Answer: A,E

NEW QUESTION: 2

A. Option D

B. Option A

C. Option C

D. Option B

Answer: C

Explanation:

Windows Deployment Services (WDS) is a server role that enables you to remotely deploy Windows operating systems. You can use it to set up new computers by using a network-based installation. This means that you do not have to install each operating system directly from a CD, USB drive or DVD. To use Windows Deployment Services, you should have a working knowledge of common desktop deployment technologies and networking components, including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), and Active Directory Domain Services (AD DS). It is also helpful to understand the Preboot execution Environment (also known as Pre-Execution Environment).

NEW QUESTION: 3

After a new user moves furniture into a cubicle, the computer does not connect to the network any longer. Which of the following would be the MOST likely reason? (Select TWO).

A. Bad Ethernet switch port

B. TX/RX reversed

C. Bad patch cable

D. Bad connectors

E. Mismatched MTU

Answer: C,D
