Answer: C

NEW QUESTION: 3

Authentication is typically based upon:

- A. Something you are.
- B. Something you have.
- C. All of the choices.
- D. Something you know.

Answer: C

Explanation:

Authentication is a means of verifying the eligibility of an entity to receive specific categories of information. The entity could be individual user, machine, or software component. Authentication is typically based upon something you know, something you have, or something you are.
