**NEW QUESTION: 1**
Your company has an internal Web site that requires HTTPS. The Web site's certificate is self-signed. You have a computer that runs Windows 7 and Windows Internet Explorer 8.
You use HTTPS to browse to the Web site and receive the following warning message. "There is a problem with this website's security certificate."
You need to prevent the warning message from appearing when you access the Web site. What should you do?
**A.** From Certificate Manager, import the Web sites certificate into your Trusted Root Certification Authorities store.
**B.** From Internet Explorer, enable InPrivate Browsing.
**C.** From Internet Explorer, add the Web site to the Trusted sites zone.
**D.** From Certificate Manager, import the Web sites certificate into your Personal store.
**Answer: A**
Explanation:
Certificate Manager A certificate manager can approve certificate enrollment and revocation requests, issue certificates, and manage certificates. This role can be configured by assigning a user or group the Issue and Manage Certificatespermission. When you assign this permission to a user or group, you can further refine their ability to manage certificates by group and by certificate template. For example, you might want to implement a restriction that they can only approve requests or revoke smart card logon certificates for users in a certain office or organizational unit that is the basis for a security group.Importing CertificatesYou may restore certificates and the corresponding private keys from a file.
6.Right-click the certificate store you want to import, and click Install PFX on the context menu.
7.The Certificate Import Wizard launches. Click Next.
8.In the File name text box, type the name of the certificate file that you want to import. Alternatively, you can find the file by clicking Browse.
9.Click Next. If the file specified is a Personal Information Exchange-PKCS #12 (*.pfx), you will be prompted for the password. Enter the password to import the file. Click Next.
10.
On the next page, select where you'd like to store the certificate. Click Next.
11.
The next wizard page contains summary information about the file that you are importing. Click Finish to import the file. The certificate(s) are now ready for use by the system.

**NEW QUESTION: 2**
HOTSPOT
For each of the following statements, select Yes if the
statement is true. Otherwise, select No. Each correct selection
is worth one point.

**Answer:**

Azure Portal에서 컨테이너를 만들려면 어떻게 합니까?

**Answer:**
Explanation:
See explanation below.
Explanation
Azure portal create public container
To create a container in the Azure portal, follow these steps:
Step 1. Navigate to your new storage account in the Azure portal.
Step 2. In the left menu for the storage account, scroll to the lob service section, then select Blobs.
Select the + Container button.
Type a name for your new container: bios
Set the level of public access to the container: Select anonymous access.

Step 3. Select OK to create the container.
