NEW QUESTION: 1

DRAG DROP

You manage update compliance for Windows 10 desktop computers that are part of a domain. You need to configure new desktops to automatically receive updates from an intranet resource that you manage.

Which three actions should you perform in sequence?

Select and Place:

Answer:

Explanation:

Explanation/Reference:

Explanation:

Box 1: Create a GPO that enables automatic updates through the intranet source.

Box 2: gpupdate /force

The Gpupdate command refreshes local andActive Directory-based

Group Policy settings, including security settings. The /force Ignores all processing optimizations and reapplies all settings.

Box 3: Configure the clients to install updates automatically.

IncorrectAnswers:

* Client side targeting

With client-side targeting, you enable client-computers to add themselves to the computer groups you create in the WSUS console.

NEW QUESTION: 2

Which business case scenario does NOT fit IBM SPSS Modeler capabilities?

- A.** A bank fights the spread of an eroding customer base by using predictive analytics to identify customers likely to leave the bank.
- B.** An insurance firm uses SPSS Modeler to help plan and optimize its outbound marketing campaigns across product groups and channels.
- C.** A stockbroker delivers above average market returns by using IBM SPSS Modeler to pick stocks to invest in.
- D.** A college relies on SPSS Modeler to predict which students are less likely to return to school.

Answer: D

NEW QUESTION: 3

Which two statements are true about STP port states? (Choose two.)

- A.** A port that has been administratively disabled under the STP protocol drops all BPDUs.
- B.** A port that has been administratively disabled under the STP protocol floods all BPDUs.
- C.** In the learning state, the port drops all data packets.
- D.** In the listening state, the port forwards all data packets.

Answer: A,C

Explanation:

B: A port in the disabled state is manually isolated from the network. A port in the disabled state does not participate in frame forwarding or the operation of STP because a port in the disabled state is considered non-operational.

C: The learning state is a 15-second interval during which the bridge does not pass user data frames while the bridge is building its bridging table. As the bridge receives frames, it places the source MAC address and port of each frame into the bridging table. The learning state reduces the amount of flooding required when data forwarding begins.
