NEW QUESTION: 1

Sam added the required parameter to the necessary configuration files for enabling Quality of Service (QoS) on the IBM Domino server. When Sam restarted Domino the Server Console did not display any QoS status/event messages or indications that it is running. What must Sam do in order to ensure QoS is running and view the configuration and events for the current logged run?

- A. Start the Domino server as an application and use the tell qos resume command at the Domino server console to resume QoS and view its configuration and event messages.
- B. Start the Domino server as either service or application and view the QoS configuration and event messages from the notes.log file.
- C. Start the Domino server under the Java controller and use the qosctnrlr<timestamp>.out file to view the QoS configuration and event messages.
- D. Start the Domino server as a service and use the remote server console to view the QoS configuration and event messages.

Answer: C
