- C. It regenerates the signal to compensate for signal degradation from line transmission.

- D. It provides signal conversion.
 - E. It operates at Layer 2 of the OSI model.
- Answer: A,C,D**

NEW QUESTION: 2

Routes of entry for accidental poisoning is the same as for allergic reactions. What route is the most common route of entry for a poisoning?

- A. Absorption
- B. Inhalation
- C. Ingestion
- D. Injection

Answer: C

NEW QUESTION: 3

DRAG DROP You need to identify which configurations must be used to meet the web conferencing requirements. Which configuration should you identify for each requirement? To answer, drag the appropriate configuration to the correct requirement in the answer area. Each configuration may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

Box 1: A Client policy. Applies only to users from Litware. Box

2: A conferencing policy. Applies to all users.

Box 3: A Client policy. Applies only to users from Litware. Box 4: Meeting configuration. Note:

*Among other things, client policies help determine the features of Lync Server that are available to users; for example, you might give some users the right to transfer files while denying this right to other users. In Lync Server, client policies replace the Group Policy settings used in previous versions of the product.

*Conferencing policy is a user account setting that specifies the conferencing experience for participants. Conferencing policies determine the features and capabilities that can be used in a conference; this includes everything from whether or not the conference can include IP audio and video to the maximum number of people who can attend a meeting. Example: The command shown in the Example modifies a property value of the conferencing policy SalesConferencingPolicy; in particular, the command sets the value of the AllowConferenceRecording property to False. To do this, Set-CsConferencingPolicy is called along with the Identity parameter

and the AllowConferenceRecording parameter.

Set-CsConferencingPolicy -Identity SalesConferencingPolicy

-AllowConferenceRecording \$False

*Meeting configuration settings help dictate the type of meetings (also called "conferences") that users can create, as well as control how (or even if) anonymous users and dial-in conferencing users can join these meetings. In this scenario the meeting configuration applies to: The following customizations can be made for meeting invitations:

Customizations are made within the Meeting Configuration settings and can be scoped on a Global, Site, or Pool level. Section 2:

Sec Two (11 to 20) Details:Topic 2, Margie's Travel Overview
General Overview Margie's Travel is an executive travel company that has 7,000 employees. The company has a sales department and a research department. Physical Locations The company has a main office and two branch offices. The main office is located in Montreal. The branch offices are located in New York and Seattle. The number of users in each office is shown in the following table.

All offices connect to each other by using a WAN link. Existing Environment Active Directory Environment The network contains one Active Directory forest named margiestravel.com. Each office is configured as an Active Directory site. Lync Server Environment The company has a Lync Server 2010 infrastructure in the Montreal office. The network contains four servers. The servers are configured as shown in the following table.

Lync Server 2013 Standard Edition is deployed in the Montreal office as a pilot on a separate network segment. You create several test users on the Lync Server 2013 pilot. User Issue An administrator modifies the global client version policy of the Lync Server 2013 pilot deployment. After the modification, Lync Server 2013 users report that they fail to sign in to Microsoft Lync 2010 and they receive the following error message.

Requirements

Planned Changes After a successful pilot program,

the company plans to deploy Lync Server 2013 on the production network for all users. The Lync Server 2013 deployment will include the following roles:

-Edge Server

-Front End Server

-Mediation Server

-Monitoring Server

-Office Web Apps Server Lync Server 2013 and Lync Server 2010 will coexist for six month. Monitoring Requirements A

monitoring solution must save call quality data for 180 days.

Backup Requirements An administrator plans to perform a weekly manual backup of the Lync Server databases. The backup files will be copied to an offsite location. Conferencing

Requirements The company plans to implement a conferencing solution to meet the following requirements:

- The company's executives must be able to create conferences that contain up to 250 participants.
- The company's managers must be able to create conferences that contain up to 50 participants.
- All other users must be prevented from creating conferences that contain more than 15 users.

NEW QUESTION: 4

A company wants to protect against Denial of Service attacks and has launched a new project. They want to block the attacks that go above a certain threshold and for some others they are just trying to get a baseline of activity for those types of attacks so they are letting the traffic pass through without action.

Given the following:

- The interface to the Internet is on WAN1.
- There is no requirement to specify which addresses are being protected or protected from.
- The protection is to extend to all services.
- The tcp_syn_flood attacks are to be recorded and blocked.
- The udp_flood attacks are to be recorded but not blocked.
- The tcp_syn_flood attack's threshold is to be changed from the default to 1000.

The exhibit shows the current DoS-policy.

Which policy will implement the project requirements?

A)

B)

C)

D)

A. Option A

B. Option B

C. Option D

D. Option C

Answer: B,C

Explanation:

Explanation/Reference:

B&D both have same policy which fulfills the above criteria.
