Explanation

#secure boot-image

This command enables or disables the securing of the running Cisco IOS image. Because this command has the effect of "hiding" the running image, the image file will not be included in any directory listing of the disk.

C. Azure Resource Managerãf'ãfãfãf¼ã, çãf•ã, ã, çãf«

D. Azure Key Vault

E. Appsettings.jsonãf•ã, ã, çãf«

Answer: D

Explanation:

When you need to pass a secure value (like a password) as a parameter during deployment, you can retrieve the value from an Azure Key Vault. You retrieve the value by referencing the key vault and secret in your parameter file. The value is never exposed because you only reference its key vault ID. The key vault can exist in a different subscription than the resource group you are deploying to.
