#### **NEW QUESTION: 1**

Eine Organisation hat beschlossen, die Lohn- und Gehaltsabrechnung auf eine neue Plattform zu migrieren, die von einem Dritten in einem anderen Land gehostet wird. Welche der folgenden Punkte ist für den IS-Prüfer am wichtigsten?

- A. Einhaltung der Finanzvorschriften durch den Dienstleister
- B. Vom Dienstleister berechnete Speicherkosten
- C. Die Einhaltung der Datenschutzbestimmungen durch den Dienstleister
- D. Gibt an, ob der Vertrag eine Kündigungsklausel enthält

**Answer: C**

#### **NEW QUESTION: 2**

All client computers in your network run Windows 7 Enterprise. You need to prevent all standard user accounts from running programs that are signed by a specific publisher.

What should you do?

- A. Use software restriction policies. Create a hash rule.
- B. Use AppLocker application control policies. Create a Windows Installer rule.
- C. Use AppLocker application control policies. Create an Executable rule.
- D. Use software restriction policies. Create a path rule.

**Answer: C**

Explanation:

The AppLocker Microsoft Management Console (MMC) snap-in is organized into four areas called rule collections.

The four rule collections are executable files, scripts, Windows Installer files, and DLL files.

These collections give the administrator an easy way to differentiate the rules for different types of applications.

Rule conditions are criteria that the AppLocker rule is based on.

Primary conditions are required to create an AppLocker rule.

The three primary rule conditions are publisher, path, and file hash.

**Publisher**

This condition identifies an application based on its digital signature and extended attributes. The digital signature contains information about the company that created the application (the publisher). The extended attributes, which are obtained from the binary resource, contain the name of the product that the application is part of and the version number of the application. The publisher may be a software development company, such as Microsoft, or the information technology department of your organization.

**Path**This condition identifies an application by its location in the file system of the computer or on the network. AppLocker uses path variables for directories in Windows.

**File hash**

When the file hash condition is chosen, the system computes a cryptographic hash of the identified file.

### **NEW QUESTION: 3**

An organization is moving internal core data-processing functions related to customer data to a global public cloud provider that uses aggregated services from other partner organizations. Which of the following compliance issues will MOST likely be introduced as a result of the migration?

- A. Company audit functions, cross-bordering jurisdictional challenges, and export controls

- B. Data ownership, internal data classification, and risk profiling of outsourcers
- C. Internal data integrity standards and outsourcing contracts and partnerships
- D. Data privacy regulations, data sovereignty, and third-party providers

**Answer: D**

**NEW QUESTION: 4**

Contoso. Ltd. hosts the following ASP.NET workloads in Azure:

Users of the Sales software report mismatches between shown inventory at the time of sale and actual availability.

Transactions across the two systems result in inconsistent reads and writes. You encapsulate Sales order creation and Inventory status updates in elastic transactions.

You need to recommend changes to code and the databases to support transactions.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**
