Customers who spend a little time in looking through the Health and Welfare Plans - Plan Types and Administration exam collection can also get the hang of the key strategy to answering the questions, There is no doubt that the B3 certification is a popular exam in the industry.

So please trust us and our B3 exam torrent materials like our confidence toward you, All the customers who purchased the WorldatWork B3 exam questions and answers will get the service of one year of free updates.

Siamprogroup is trusted by thousands of people for the preparation of their exams, You can view Siamprogroup's content by downloading free WorldatWork B3 dumps demo before buying WorldatWork Other Certification PDF actually.

NEW QUESTION: 1

You need to deploy the new SQL Server virtual machines. What should you do?

- A.** On the specified cluster nodes in the primary data center in Seattle, run the following Windows PowerShell command: `Set-SCVMHost -AvailableForPlacement`
- B.** On Chi-Primary, run the following Windows PowerShell cmdlet for the specified nodes: `Add-ScCustomPlacementRule`
- C.** On the specified cluster nodes in the primary data center in Chicago, select the Host is available for placement check box.
- D.** On Sea-Primary, configure placement rules for the specified nodes.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Scenario: A Hyper-V cluster named Cluster1.contoso.com includes two unused SQL Server virtual

machines (VMs) named SQL-SERVER1 and SQL-SERVER2. The cluster also includes a Hyper-V Host group named Chi-Primary. The Add-SCCustomPlacementRule adds a custom placement rule to

the placement configuration for a

host group.

Testlet 1

Overview

Contoso, Ltd., is a recruiting and staffing company that has offices throughout North America.

The company has a main office and six branch offices. The main office is located in Miami. The branch offices are located in New York, Seattle, Los Angeles, Montreal, Toronto, and Vancouver.

Existing Environment

Network Infrastructure

The network contains one Active Directory domain named contoso.com.

The main office has the following servers:

One file server that maintains multiples shares

Two domain controllers configured as DNS servers

One Windows Server Update Services (WSUS) server

Two DHCP servers that each have a scope for all of the subnets

Two servers that have Failover Clustering configured and are used as virtualization hosts

One server that has Microsoft SQL Server 2012 installed and maintains a customer relationship

management (CRM) database

Each branch office has the following servers:

One domain controller configured as a DNS server

One DHCP server that has a single scope for its respective office

Each office has a single subnet. The network speed of the local area network (LAN) is 1 gigabit per second. All of the offices have a high-speed connection to the Internet. The offices connect to each other by using VPN appliances.

Current Issues

Users report that it can take a long time to download files from network shares in the main office.

A root cause analysis identifies that network traffic peaks when the users experience this issue.

Requirements

Planned Changes

The company plans to implement the following changes:

Replace all of the domain controllers with new servers that run Windows Server 2012.

Upgrade the CRM application to use a web-based application that connects to the current CRM

database. The web application will store session data in the memory of each web server.

Initially, deploy two front-end web servers to two virtual machines. Additional virtual web servers will be

deployed in the future.

Monitor the availability of the CRM application and create alerts when the overall availability is less than

99 percent.

Implement Microsoft System Center 2012 to manage the new environment.

Business Requirements

The company identifies the following business requirements:
Minimize hardware costs and software costs whenever possible.

Minimize the amount of network traffic over the VPN whenever possible.

Ensure that the users in the branch offices can access files currently on the main office file server if an

Internet link fails.

Technical Requirements

The company identifies the following technical requirements:
Provide a highly available DHCP solution.

Maintain a central database that contains the security events from all of the servers. The database

must be encrypted.

Ensure that an administrator in the main office can manage the approval of Windows updates and

updates to third-party applications for all of the users.

Ensure that all of the domain controllers have the ReliableTimeSource registry value in

HKEY_LOCAL_MACHINE

\SYSTEM\CurrentControlSet\Services\W32Time\Parameters set to 1, even if an administrator changes that value manually.

Virtualization Requirements

The company identifies the following virtualization requirements:

Minimize the number of permissions and privileges assigned to users.

Ensure that the members of a group named Group2 can add a WSUS server to the fabric.

Ensure that a diagram view of the virtualization environment can be generated dynamically.

Minimize the amount of administrative effort required to manage the virtualization environment.

Prevent the failure of a front-end web server from affecting the availability of the CRM application.

Ensure that the members of a group named Group1 can create new virtual machines in the Los

Angeles office only.

Only create virtual machine templates by using objects that already exist in the System Center 2012

Virtual Machine Manager (VMM) library.

On the failover cluster in the main office, apply limited distribution release (LDR) updates to the

virtualization hosts without disrupting the virtual machines hosted on the virtualization hosts.

NEW QUESTION: 2

Which type of I/O refers to the number of I/O requests the array controller sends to the drives, including RAID overhead?

- A. Serial I/O
- B. Parallel I/O
- C. Logical I/O
- D. Physical I/O

Answer: D

NEW QUESTION: 3

Given the code fragments:

What is the result?

- A. Compilation fails at line n1
- B. Super Sub Sub
- C. Contract Contract Super
- D. Compilation fails at line n2

Answer: B
