sensitive information of have any technical details online.
Within the context of penetration testing methodology, what
phase is Bob involved with?
A. Vulnerability Mapping
B. Attack phase
C. Active information gathering
D. Passive information gathering
Answer: D
Explanation:
He is gathering information and as long as he doesn't make
contact with any of the targets systems he is considered
gathering this information in a passive mode.

NEW QUESTION: 2
Note: This question is part of a series of questions that use
the same scenario. For your convenience, the scenario is
repeated in each question. Each question presents a different
goal and answer choices, but the text of the scenario is
exactly the same in each question in this series.
Start of repeated scenario
Your network contains an Active Directory domain named
contoso.com. The functional level of the forest and the domain
is Windows Server 2008 R2.
The domain contains the servers configured as shown in the
following table.

All servers run Windows Server 2016. All client computers run
Windows 10.
You have an organizational unit (OU) named Marketing that
contains the computers in the marketing department You have an
OU named finance that contains the computers in the finance
department You have an OU named AppServers that contains
application servers.
A Group Policy object (GPO) named GP1 is linked to the
Marketing OU. A GPO named GP2 is linked to the AppServers OU.
You install Windows Defender on Nano1.
End of repeated scenario
