Firstly, PDF Version of Module-0 valid dumps questions is convenience for you to read, print and take notes.

**NEW QUESTION: 1**

A primary vendor tells you that their purchase order (PO) items will be delivered seven days later than expected. You find another vendor that carries the product and can deliver it the next day.

You need the purchases from both vendors, but only one PO exists in the system.

You need to ensure that the system correctly reflects the inbound products from both vendors.

How should you complete the setup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

Explanation:

**NEW QUESTION: 2**

OCI is a cloud infrastructure provider. You are configuring OCI Terraform to connect to OCI. You need to ensure that the OCI Terraform configuration is correct.

Which two options should you select to complete the setup? (Choose two.)

A. terraform apply -auto-approve

B. terraform refresh -target = oci\_database\_db\_system.db\_system

C. terraform plan -target = oci\_database\_db\_system.db\_system

D. terraform apply -target = oci\_database\_db\_system.db\_system

**Answer: A**

Explanation:

## Explanation

Command: refresh

The terraform refresh command is used to reconcile the state Terraform knows about (via its state file) with the real-world infrastructure. This can be used to detect any drift from the last-known state, and to update the state file.

This does not modify infrastructure, but does modify the state file. If the state is changed, this may cause changes to occur during the next plan or apply.

Command: plan

The terraform plan command is used to create an execution plan. Terraform performs a refresh, unless explicitly disabled, and then determines what actions are necessary to achieve the desired state specified in the configuration files.

This command is a convenient way to check whether the execution plan for a set of changes matches your expectations without making any changes to real resources or to the state Command:

apply The terraform apply command is used to apply the changes required to reach the desired state of the configuration, or the pre-determined set of actions generated by a terraform plan execution plan.

Adding the -auto-approve option avoids having to type 'yes' at a confirmation prompt Note: Terraform will automatically refresh the state before running a command that would rely on it (such as plan, apply, destroy)

## NEW QUESTION: 3

A. DSW1 (config)# ipv6 dhcp relay destination

2002:404:404::404:404 GigabitEthernet 1/2

B. DSW1 (dhcp-config)# default-router 2002:A04:A01::A04:A01

C. DSW1 (config)#ipv6 route 2002:404:404::404:404/128

FastEthernet 1/0

D. DSW1 (config-if)# ipv6 helper address 2002:404:404::404:404

**Answer: A**
