NEW QUESTION: 1

Data has been prepared for a case, however it was broadly gathered without any restrictions.

Which two options are available in Symantec eDiscovery Platform 8.0 to restrict data processing via the pre-processing options? (Select two.)

A. Filter by Date

- B. Filter by File Type
- C. Filter by Keyword
- D. Filter by Source Type
- E. Filter by Author

Answer: A,B

NEW QUESTION: 2

For refund requests, Autoinvoice automatically places the on-account amount of a refund request if _____ and _____.

- A. installments that existed on the transaction were fully paid
- B. the receipt to be refunded has NOT yet been remitted
- C. the receipt does NOT have on account credit memo against it
- D. receipts with different payment types were used to pay the same transaction to be credited

Answer: A,C

Explanation:

D: You can only use automated receipt handling for credits with approved credit memos.

Note:

During AutoInvoice import, the process flow for automated receipt handling for credits is as follows:

*

AutoInvoice verifies that the transaction source assigned to the credit memo has automated receipt handling enabled.

*

AutoInvoice evaluates each credit memo and its associated transaction to determine eligibility for automatic receipt handling. To be eligible:

*

If eligible, then AutoInvoice unapplies the paid transaction from the receipt to be credited.

*

AutoInvoice creates the credit memo in the amount of the requested credit, and applies the credit to the transaction.

*

If your policy is to automatically refund your customers, then AutoInvoice evaluates the receipt for refund eligibility. To be eligible, the receipt must not be in doubt.

*

If eligible for refund, AutoInvoice creates the refund for all credit request amounts that are greater than or equal to the value entered in the Minimum Refund Amount system option.

AutoInvoice places on account any credit amount that is less than the specified minimum.

*

AutoInvoice applies the appropriate receivable activity to the receipt, as determined by the transaction source.
