Note:
* From scenario:
/All servers must be virtualized unless otherwise specified.
/The database servers must be physical machines running Windows Server 2012 with direct access to storage.
/All database transaction logs must be sent off-site.
(so we configure log shipping destination on Server3 which is located in New York - while server1 and server2 are both in Chicago).
/The database servers must be configured for redundancy.
* SQL Server Log shipping allows you to automatically send transaction log backups from a primary database on a primary server instance to one or more secondary databases on separate secondary server instances.

Testlet 1
Background
You are the SharePoint server administrator for Contoso, Ltd. Contoso has a SharePoint 2010 environment hosted on SharePoint Online and a separate on-premises SharePoint 2010 farm. You are preparing to upgrade the environments to newer versions of SharePoint. You are also planning to support a hybrid on-premises/cloud deployment that will be available to customers, partners, and third-party vendors.
Contoso collaborates with a partner company, Tailspin Toys, on multiple projects.

Technical Environment

All user groups reside in the existing Active Directory Domain Services (AD DS) domain corp.contoso.com.

The existing SharePoint Online environment is configured as follows:

The SharePoint Online URL assigned by Microsoft is http://contoso.sharepoint.com.

The SharePoint Online Administration Center URL is https://contoso.admin.sharepoint.com.

The user name for the Contoso Office 365 administrator is

An existing line-of-business application provides an OData service that is hosted in Microsoft Windows

Azure SQL Database.

The site collections are described in the following table.

Business Requirements

The upgraded SharePoint environments must meet the following business requirements:

All SharePoint 2013 features must be available to all users when connecting from inside or outside of

the corporate network.

Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook

clients and receive content from external users who send email directly to the site.

The Corporate Projects site collection must be available to internal users who connect from outside of

the corporate network and must not require a VPN connection.

Third-party vendors must be able to read and modify documents.

Technical Requirements

You must meet the following technical requirements:

Before upgrading the Partner Projects site collection, create a duplicate, upgraded copy of the site for

review and verification purposes.

Use Active Directory Federation Services (AD FS) 2.0 to authenticate Contoso employees, partners,

and customers.

Automate the sign-in experience by using the local AD FS 2.0 servers for AD FS single sign-on (SSO).

Ensure that a web usage report that contains traffic reports, search reports, and inventory reports can

be provided for any site.
The upgraded SharePoint environments must meet the following technical requirements:
All user profile information that resides in Active Directory must be available in SharePoint Online.

All sites must be able to share a mail-enabled document library that resides in the cloud.

The existing line-of-business application must be consumed as an external content type by using

Microsoft Business Connectivity Services (BCS).
The Partner Projects site collection must allow Contoso and Tailspin Toys users to share documents

with third-party vendors on an ad-hoc basis, without incurring additional licensing requirements.
