NEW QUESTION: 3

A business analyst has determined that there are five possible solutions to a business need. If the business analyst completes the solution assessment on multiple solutions, what is the goal of the assessment?

- A. The business analyst should determine the opportunity cost of each assessment.
- B. The business analyst should determine which solution has the greatest business value.
- C. The business analyst should only have one solution, not five.
- D. The business analyst should determine which solution is quickest to implement.

Answer: B

Explanation:

Explanation

The purpose of assessing proposed solutions is to determine how closely they meet stakeholder and solution requirements. The business analyst, while assessing a single solution, determines whether the solution delivers enough business value to justify

its implementation.

However, the business analyst has the additional goal of attempting to determine which solution delivers the greatest business value while assessing multiple alternative solutions. Answer C is incorrect. The business analyst can have multiple solutions for a business need.

Answer B is incorrect. The opportunity cost is not applicable to this scenario.

Answer D is incorrect. The fastest implementation may not necessarily be the best solution for an organization.

NEW QUESTION: 4
