We offer the valid & reliable GCP-GC-ADM practice test and GCP-GC-ADM certification training files since 2007, Payment and refund is easy by Credit Card, As you know, **GCP-GC-ADM New Braindumps Book** when choosing a learning product, what we should value most is its content.

If you have any query about the Genesys certifications, please feel free to write us, Our service are working at 24/7 online to give you the best and the most professional guidance on our GCP-GC-ADM learning braindumps.

Pass Guaranteed Newest GCP-GC-ADM - Genesys Cloud Certified Professional - Contact Center Administration New Braindumps Book

Your absolutely can pass the exam, When you take part in the real exam, you **GCP-GC-ADM New Braindumps Book** will reduce mistakes, We can save your time and energy to arrange time schedule, search relevant books and document, ask the authorized person.

GCP-GC-ADM actual practice pdf can save you from both of it, You will receive the email from our company in 5 to 10 minutes after you pay successfully;

NEW QUESTION: 1

For security implementation, the IT Security Manager Job role hierarchy includes the Data Access Administration Duty role, which is entitled to manage data access.

For which task is the "Manage Data Access Sets Task" used?

- A.** securing a common object such as an attachment category of a profile option
- B.** creating data and function roles In Request management
- C.** nothing; cannot be used anywhere
- D.** viewing, creating, or changing a data roles template
- E.** viewing, treating, or updating data access sets used to secure ledger and ledger sets

Answer: E

Explanation:

Manage Data Access Sets

Data access sets define a set of access privileges to one or more ledgers or ledger sets.

The information on ledgers that are attached to data access sets are secured by function security. Users must have access to the segment values associated with the data access sets to access the corresponding GL account.

In the security reference implementation, the IT Security Manager job role hierarchy includes the Data Access Administration Duty role, which is entitled to manage data access sets (the entitlement is Define General Ledger Data Access Set). This entitlement provides the access necessary to perform the Manage Data Access Sets task in General Ledger. Reference: Oracle Fusion Applications Security Guide, Manage Data Access Sets

NEW QUESTION: 2

A network security engineer needs to configure a virtual router using IPv6 addresses.

Which two routing options support these addresses? (Choose two.)

- A. BGP
- B. OSPFv3
- C. RIP
- D. Static Route

Answer: B,D

Explanation:

Explanation/Reference:

C: OSPFv3 provides support for the OSPF routing protocol within an IPv6 network. As such, it provides support for IPv6 addresses and prefixes.

A: How to Set Default Route for IPv6 Traffic

Steps

1. Go to Network > Virtual Router
2. Add a Virtual Router and go to Static Routes > IPv6.
3. Add a Static Route:
 - A. Set destination (example, IPV4 0.0.0.0/0) as ::0/
 - B. Select the Interface
 - C. Set the Next Hop IP address
