Answer: C

NEW QUESTION: 4

Your company has a set of EC2 Instances defined in AWS. They need to ensure that all traffic packets are monitored and inspected for any security threats. How can this be achieved? Choose 2 answers from the options given below Please select:

- A. Use Network Access control lists logging
- B. Use VPC Flow logs
- C. Use a third party firewall installed on a central EC2 instance

D. Use a host based intrusion detection system

Answer: C,D

Explanation:

If you want to inspect the packets themselves, then you need to use custom based software A diagram representation of this is given in the AWS Security best practices

Option C is invalid because VPC Flow logs cannot conduct packet inspection.

For more information on AWS Security best practices, please refer to below URL:

The correct answers are: Use a host based intrusion detection system. Use a third party firewall installed on a central EC2 Submit your Feedback/Queries to our Experts
