important things.

Some of our packages also come with discounts, so you can choose any package according to your needs, The PDF version of our CIS-Discovery study materials can be printed and you can carry it with you.

NEW QUESTION: 1

Cisco

APIC is a southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

A.

APIC is a southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

B.

APIC is a southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

C. APIC is a southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

D.

APIC is a southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

Answer: A

Explanation:

Explanation

The southbound protocol used by APIC is OpFlex that is pushed by Cisco as the protocol for policy enablement across physical and virtual switches.

Southbound interfaces are implemented with some called Service Abstraction Layer (SAL), which talks to the network elements via SNMP and CLI.

Note: Cisco OpFlex is a southbound protocol in a software-defined network (SDN).

NEW QUESTION: 2

A company plans to move regulated and security-sensitive businesses to AWS. The Security team is developing a framework to validate the adoption of AWS best practice and industry-recognized compliance standards. The AWS Management Console is the preferred method for teams to provision resources.

Which strategies should a Solutions Architect use to meet the business requirements and continuously assess, audit, and monitor the configurations of AWS resources? (Choose two.)

A. Use AWS Config rules to periodically audit changes to AWS resources and monitor the compliance of the configuration. Develop AWS Config custom rules using AWS Lambda to establish a test-driven development approach, and further automate the evaluation of configuration changes against the required controls.

B. Use AWS CloudTrail events to assess management activities of all AWS accounts. Ensure that CloudTrail is enabled in all

accounts and available AWS services. Enable trails, encrypt CloudTrail event log files with an AWS KMS key, and monitor recorded activities with CloudWatch Logs.

C. Use Amazon CloudWatch Logs agent to collect all the AWS SDK logs. Search the log data using a pre-defined set of filter patterns that machines mutating API calls. Send notifications using Amazon CloudWatch alarms when unintended changes are performed. Archive log data by using a batch export to Amazon S3 and then Amazon Glacier for a long-term retention and auditability.

D. Use CloudTrail integration with Amazon SNS to automatically notify unauthorized API activities.

Ensure that CloudTrail is enabled in all accounts and available AWS services. Evaluate the usage of Lambda functions to automatically revert non-authorized changes in AWS resources.

E. Use the Amazon CloudWatch Events near-real-time capabilities to monitor system events patterns, and trigger AWS Lambda functions to automatically revert non-authorized changes in AWS resources. Also, target Amazon SNS topics to enable notifications and improve the response time of incident responses.

Answer: A,B

NEW QUESTION: 3

Which of the following is a DNS database resource record containing the host DNS name and the IPv6 address?

- A. AAAA
- B. Bzip2
- C. HOST
- D. IPv6

Answer: A

NEW QUESTION: 4

C Company is a public company with 40 million shares outstanding. The company has a market capitalization of \$1 billion. The company is currently trading at a price of \$25 per share. The company has a debt-to-equity ratio of 0.5. The company has a return on equity of 15%. The company has a return on assets of 10%. The company has a return on investment of 12%. The company has a return on capital of 14%. The company has a return on assets before taxes of 16%. The company has a return on assets after taxes of 14%. The company has a return on assets before taxes and after taxes of 14%. The company has a return on assets before taxes and after taxes of 14%.

- A. The company has a return on equity of 15%.
- B. The company has a return on assets of 10%.
- C. The company has a return on investment of 12%.

D. Cì·`ì§€èš€ YěŠ" ì•„ë<™ë<^ë<α.

Answer: D

Explanation:

KG's offer should be accepted because its cost is US \$40,000 (1,000 units x \$40), but the increase in throughput contribution is US \$72,000 [1,000 units \$120 unit price - \$48 E' 1 per unit)]. Hence, the relevant cost of QC's offer is less than the incremental throughput contribution. ms's offer effectively increases the capacity of the bottleneck operation. Y's offer should be rejected because, even though its US \$7 unit price is less than the US \$8 unit operating cost (excluding direct materials) for Operation 1. it will result in the incurrence of additional costs with no increase in throughput contribution, given that Operation 2 is already producing at its 150,000-unit capacity.
