You can just free download the demos of the PEGAPCSA86V1 practice guide to have a check our quality.

NEW QUESTION: 1
DRAG DROP
A user is unable to connect to the Internet. Based on the layered approach to troubleshooting and beginning with the lowest layer, drag each procedure on the left to its proper category on the right.

Answer:
Explanation:

Explanation:

The question asks us to "begin with the lowest layer" so we have to begin with Layer 1:
verify physical connection; in this case an Ethernet cable connection. For your information,
"verify Ethernet cable connection" means that we check if the type of connection
(crossover, straight-through, rollover...) is correct, the RJ45 headers are plugged in, the signal on the cable is acceptable...
Next we "verify NIC operation". We do this by simply making a

ping to the loopback interface 127.0.0.1. If it works then the NIC card (layer 1, 2) and TCP/IP stack (layer 3) are working properly.
Verify IP configuration belongs to layer 3. For example, checking if the IP can be assignable for host, the PC's IP is in the same network with the gateway...
Verifying the URL by typing in your browser some popular websites like google.com, microsoft.com to assure that the far end server is not down (it sometimes make we think we can't access to the Internet). We are using a URL so this step belongs to layer 7 of the
OSI model.

NEW QUESTION: 2
How can network administrators upgrade AirMatch on an Aruba Mobility Master (MM)?
A. Upgrade Client Match as part of a global software upgrade, and upgrade AirMatch separately as a loadable service module (LSM).
B. Upgrade Client Match and AirMatch separately as loadable service modules (LSMs).
C. Upgrade AirMatch as part of a global software upgrade, and upgrade Client Match separately as a loadable service module (LSM).
D. Upgrade AirMatch and Client Match through a global software upgrade.
Answer: B

NEW QUESTION: 3
What is the MOST effective way to determine a mission critical asset in an organization?
A. Threat analysis
B. business process analysis
C. Business risk analysis
D. Vulnerability analysis
Answer: B

NEW QUESTION: 4
Universal Containers (UC) has three systems: Salesforce, a cloud -based ERP system, and an on -premise Order Management System (OMS). An architect has been tasked with creating a solution that uses Salesforce as the system of record for Leads and the OMS as the system of record for Account and Contacts. UC wants Accounts and Contacts to be able to maintain their names in each system (i.e., "John Doe" in the OMS and "Johnny Doe" in Salesforce), but wants to have a consolidated data store which links referenced records across the systems. What

approach should an architect suggest so the requirements are met?
A. Implement an integration tool to send OMS Accounts and Contacts to Salesforce.
B. Use the Streaming API to send Account and Contact data from Salesforce to the OMS.
C. Implement a Master Data Management strategy to reconcile Leads, Accounts, and Contacts.
D. Have Salesforce poll the OMS nightly and bring in the desired Accounts and Contacts.
Answer: C
